DETAILED ACTION

Receipt is acknowledged of the amendment, filed on 11/13/2008, which has been entered in the file. Claims 1, 3-8 & 10-20 are pending.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

18. (Currently Amended) A method of storing data concerning a plurality of images comprising the steps of:

printing a plurality of visible index images onto a substrate, wherein the plurality of visible index images are printed with low resolution;

applying a memory tag, comprising a passive electronic memory, to the substrate adjacent to at least one of the ~~index~~ visible index images, wherein each memory tag has storage capacity to store a high resolution copy of an image;

applying a memory tag adjacent to a border, wherein the memory tag adjacent to the border is configured to store at least one of a list of index images, respective locations of the index images, and locations of the memory tags associated with at least one of the plurality of visible index images- ; and

for each visible index image adjacent to which a memory tag has been applied, storing data associated with the visible index image in the memory tag adjacent to it, said data including the respective visible index image at high resolution.

Allowable Subject Matter

Claims 1, 3-8 & 10-20 have been allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest, regarding claims 1, 12, 17 & 18, a substrate printed with a plurality of low resolution images and coupled with plurality of memory tags wherein at least one of the plurality of index images is associated with a memory tag and wherein the memory tag associated with at least one of the plurality of index images is configured to store a high resolution copy of the index image it is associated with, when taken in combination with the other limitations of the respective claims.

Applicant's arguments, that neither Shih nor Spurr teach or suggest a memory tag with the storage capacity to store a high resolution copy of an image, see pages 6-8 of the Arguments/Remarks filed 11/13/2008, has been fully considered and is persuasive. Thus, without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art at the time of the invention to combine the teachings of the prior art in a manner so as to create the claimed invention.

Dependent claims 3-8, 10, 11, 13-16, 19 & 20 are allowable by virtue of their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
